

# Bimetal Thermometers

## Model 54, Heavy Duty Series

WIKA Data Sheet TM 54.01

### Applications

- Universally suitable for plant, machinery, tank and apparatus construction
- Facility management
- With liquid damping also suitable for applications with extreme vibrations
- Twin-Temp combined bimetal thermometer with local readout and electrical output signal

### Special Features

- Universal application
- Case and stem material stainless steel
- Bimetal with zero-point adjustment on the rear of the case
- Twin-Temp: Two independent measuring systems in one instrument (bimetal and Pt100)
- Approval Germanischer Lloyd (with feature liquid damping, version axial or radial)

### Description

This series of thermometers is designed for installation in pipes, tanks, plants and machinery. The Twin-Temp combined bimetal thermometer is also suitable for heating systems.

The stem and the case of the instrument are made from stainless steel. Various insertion lengths and process connections are available to optimally match the requirements of each process. Due to their high ingress protection (IP 65) and liquid damping these thermometers can be used in applications with extreme vibrations.

The Twin-Temp combined bimetal thermometer offers two measuring systems in one instrument. A bimetal thermometer displays the measured values on site, while the integrated Pt100 resistance sensor provides an electrical signal for further processing.

## Standard features

### Temperature element

Coiled bimetal (and Pt100 with Twin-Temp)

### Nominal size

63, 80, 100

### Design of connection

S Standard (male thread connection)

1 Plain stem

2 Male nut

3 Union nut

4 Compression fitting (sliding on stem)

5 Union nut with fitting

### Location of stem

A54XX centre back (axial)

R54XX bottom (radial)

S54XX centre back, adjustable stem and dial  
(not with Twin-Temp)

### Accuracy class

Mechanical: 1 per DIN EN 13 190

Electrical (with Twin-Temp): B per DIN IEC 751, 3-wire

### Working range

Normal: measuring range per DIN EN 13 190

Short time (24 h max.): scale range per DIN EN 13 190

### Scale, measuring ranges<sup>1)</sup>, limits of error per EN 13 190

#### Scale graduation according to WIKA standard

Scale range in °C	Measuring range in °C	Scale spacing in °C	Limit of error ± °C
-30 ... +50	-20 ... +40	0.5	1
-20 ... +60	-10 ... +50	0.5	1
0 ... 60	+10 ... +50	0.5	1
0 ... 80	+10 ... +70	0.5	1
0 ... 100	+10 ... +90	1	1
0 ... 120	+10 ... +110	1	2
0 ... 160	+20 ... +140	1	2
0 ... 200	+20 ... +180	2	2
0 ... 250	+30 ... +220	2	2.5
0 ... 300 <sup>2)</sup>	+30 ... +270	2	5
0 ... 400 <sup>2)</sup>	+50 ... +350	5	5
0 ... 500 <sup>2)</sup>	+50 ... +450	5	5

1) The measuring range is indicated on the dial by two triangular marks.  
Only within this range the stated limit of error is valid according to DIN EN 13 190.

### Case, bezel ring, stem, process connection

Stainless steel

### Elbow behind the case

Aluminium, only with radial entry version

### Dial

Satin finish aluminium with black lettering

### Window

Instrument glass

### Pointer

Black aluminium, adjustable pointer

### Pressure rating of stem

25 bar max., static

### Ambient temperature limit at the case

+60 °C max. (others on request)

### Ingress protection

IP 65 (EN 60 529 / IEC 529)

### Optional extras

- Scale range °F, °C/°F (dual scale)
- At stem with liquid damping (250 °C max.)
- GL approval with feature liquid damping,  
not with adjustable stem and dial and Twin-Temp  
(vibratory stress conditions 25 ... 200 Hz, 5 g)
- Window of laminated safety glass or acrylic plastic
- Stem diameter 6, 8, 10 mm
